

# Boxed Cushions - Soft Fill

Boxed seat and back cushions are very fashionable , they are also chosen for their look and comfort. Various types of fillings can be used the most popular are listed below but if you require others such as feather and down please ask.

A soft boxed cushion is not merely a bag of filling, or the filling would simply drop to the bottom or back as soon as it was used. These cushions are divided by deep walls that keep the filling in its place.

**IMPORTANT:** All soft cushions should be plumped up daily, depending on usage, to prevent them from going flat and hard.

Below is a price chart as a guide but do remember when pricing that all soft cushion interiors should be at least one inch bigger than the outer cover.
